How Artificial Intelligence is set to disrupt the legal profession: Understanding its impact on the practice of law.
Milwaukee Bar Association Law & Technology Conference, Milwaukee, WI
Khalid Al-Kofahi and Mike Dahn
November 30, 2018

Introduction of Panel

- Khalid Al-Kofahi, Vice President, Research & Development, Thomson Reuters, Legal
  Khalid leads corporate R&D as well as the Center for AI and Cognitive Computing. Khalid's research interests include natural language processing, information retrieval, question answering, machine learning, recommender systems and computer vision. Khalid has a Ph.D. from Rensselaer Polytechnic Institute, USA, M.S. from Rochester Institute of Technology, USA, both in Computer Engineering and a B.S. in Electrical Engineering from Jordan University of Science and Technology, Jordan.

- Mike Dahn, Senior Vice President, Westlaw Product Management, Thomson Reuters Legal
  Mike and his team have worked closely with the research scientists at the Thomson Reuters Center for AI and Cognitive Computing to incorporate the latest in machine learning and natural language processing technologies into research solutions. Prior to joining Thomson Reuters, Mike was head of libraries and intranet development for Carlton Fields, a law firm in Florida. Mike is also a veteran of the U.S. Air Force, where he was a cryptologic linguist. Mike has a law degree from Hamline University School of Law and an M.L.I.S. from the University of South Florida.

Artificial Intelligence in Law Firms

- It's all about the data.
- AI is not just one technology
- It's not magic, it's just software
- AI is already at work
- AI does not replace humans, it assists them
- Adopting AI means embracing change
- Clients will drive your need for AI

Panel Questions

- What is artificial intelligence?
- How are businesses (non-legal) using AI?
- How has artificial intelligence advanced in the legal space in recent years?
- How 'intelligent' is AI in the legal industry?
- How is AI impacting on the legal profession?
- Where can AI for the legal sector go next?
- Do you see any issues of privacy in the increasing use of AI and how do you think the increase regulation of data privacy will impact the use of AI?
- What ethical questions do you see arise with the use of AI?
- What should businesses consider before integrating AI into their processes?
